

# Emerson Process Management

## Emerson Process Management

Emerson Process Management is leading the Indian process automation market through various business units, which deliver the globally proven cutting edge technologies, products and expertise to the Indian process industries.

## Project Completed

Technowrites prepared in depth Technical Documentation (including explanation of the classes and functions, flow charts and code comments) for a software application developed in C++. The software was used along with specialized hardware for testing current to pressure transducers.

## Tools Used and Software Language

C++, MS Word, MS Visio

## Challenges

- Understanding the functionality from huge lines of C++ code
- Developing the flow charts based on the understanding of the functionality
- Coordinating with Emerson's team in India and Singapore and getting timely feedback

## Solution

Our team of in-house writers and software developers read the thousands of lines of code to understand how its logic. We then commented it and prepared the other documentation based on that. All the documents developed were discussed with the client and were updated accordingly.

***Technowrites team got a letter of appreciation from the client for doing this assignment against tough deadlines and as per high quality expectations.***
